

This New House Exhibition Presentation

1. **INTRODUCTION:** When someone walks up to your table, shake their hand and introduce yourself.
2. **PROJECT BACKGROUND:** Explain what the project was about and what you set out to do in the beginning.
3. **YOUR PROJECT BACKGROUND:** Give your project name, house location, lot size, and home square footage.
4. **BLUEPRINTS:** Show your blueprints and explain each of the following:
 - a. Why is this design passive solar?
 - b. How is your house heated and cooled each day and each season?
 - c. How did you determine the size of rooms and how did you make the drawings scale?
 - d. What special features are there inside your house?
 - e. What materials did you choose for flooring, interior walls, and why?
5. **MODEL:** Show off your model and explain the following:
 - a. Why is this design sustainable?
 - b. What is the house going to be constructed of?
 - c. What special features do you have outside of your house (deck, yard, etc.), and why is this site important to your house (passive solar and good location)?
6. **FINAL WORD:** Explain why homes should be designed this way. Why is it good for our health, our wallets, and our environment?
7. **QUESTIONS:** Ask if they have any questions.
8. **CLOSING:** Ask the guest to take a copy of your pamphlet, thank them for listening, and shake their hand!

** You may use a 3x5 card to help you remember your presentation **
