

My Skateboarding Experience

Aisling
Brennan

During this awesome project, I grew as a skater. I learned how to drop in and am proud that I was brave and confident. Josh helped me accomplish that. He was amazing!

A part that was challenging was when we were taking apart the skateboards. My group was fighting over who was going to use the socket-wrench, and we solved this problem by taking turns.

I am most proud of working hard together to take apart and rebuild our skateboards together. We had to communicate when we had different ideas.

I also learned that we have to work together to do something, you can't just do all the work.

The most challenging thing about this project was using the computer because sometimes the computer didn't want to do some things I wanted to do, and the research was hard because I couldn't find a good website for my topic. I eventually did it, and now I know how to turn and twist pictures and use a magazine website.

Thank You

Tal O'Ferrel, for showing us around Sector 9 and supporting us with our boards.

.Josh from the O.B Skatepark for helping me be successful with my skating.

. And all the room 12 parents for taking time out of their day and taking us to field trips.

.Also Ms.Carrico for helping us succeed during this project.
