

PROJECT REFLECTION BY TY VELTZ

DURING THIS PROJECT I GREW AS A SKATER AND A COMMUNITY MEMBER. AS A SKATER I NOW FEEL LIKE I HAVE BETTER BALANCE AND MY FEARS OF DROPPING IN ARE GONE. THE INSTRUCTORS TAUGHT ME THE BASICS THAT IMPROVED MY SKILLS. WE ALSO GOT A LOT OF TIME TO PRACTICE. I FEEL LIKE THE PROJECT GAVE ME OPPORTUNITIES TO WORK WITH MY CLASSMATES AND FRIENDS. IT HELPED ME WORK MORE AS A COMMUNITY MEMBER.

The critique from art class was really helpful for me. In the end I changed my focal point and background a lot and I am now proud of my final project.

One challenge for me was the amount of typing we had to do for this project. I overcame this by doing typing club and practicing. I feel like I have become a better typer too.

I am proud of my skateboard design. First we brainstormed background ideas and sketched some. I tried one and then after critique it changed. I thought more about my foreground and changed my images after looking at several examples. Then I drafted my foreground that eventually changed after a few critiques. I am proud of this because it was a process that took a while and I was stoked on the final product.

Some of the lessons I learned throughout this project that I can use throughout my fourth grade year are:
Don't give up and don't forget the past.
